

# TradeLinkOne InventoryOneM

*Right Raw Materials. Right Time.  
Right Quantity. Right Cost.  
— Just Easy.*

TradeLinkOne InventoryOneM is a powerful solution designed to transform **raw material management** by improving productivity and reducing costs. It ensures all materials are available **just-in-time** for production, makes reordering seamless and accurate, and minimizes excess inventory to **free up resources**. With real-time visibility, shipment traceability, and compliance with regulatory requirements, InventoryOneM eliminates shortages, enhances customer service, and boosts order fulfillment while reducing labor costs and improving inventory turnover for **maximum efficiency**.

### Cloud-Based ERP Integration

Streamline procurement with seamless integration to your ERP system for real-time management.

### Access to mLinkOne and TradeLinkOne Portal

Suppliers can utilize both the mLinkOne and TradeLinkOne portal to create packing lists, generate shipping labels, and submit all necessary shipping documents for enhanced traceability.

### Mobile Compatibility

Use the InventoryOneM app on mobile devices or tablets for easy scanning, receiving, and quality inspections.

### Multi-Location Support

Efficiently manage raw materials across multiple locations with centralized visibility.

### Serialization & Compliance

Ensure adherence to GS1 barcode standards, including 1D, 2D, and QR codes, with recommended RFID tagging for accuracy.

### Integrated Quality Control

Reinforce inspections with weight scales and photo features, generating immediate reports for stakeholders.

### Smart Reporting & Alerts

Customize reports and receive automated alerts to stay informed on key operations and discrepancies.
