

# TradeLinkOne Logistics Document Exchange (LDX)

*Your Gateway to Seamless Document Management*

Transform your supply chain operations with **TradeLink's Logistic Document Exchange (LDX)**. This **cloud-based** solution automates the management of crucial logistics documents, eliminating manual processes and enabling seamless digital workflows. With LDX, you'll enhance accuracy, accelerate processing times, and improve decision making, fostering **collaboration among all stakeholders**. This empowers your team to achieve greater operational success while managing **user access control** and permission levels to **enhance security** and protect sensitive information.

## Automated Document Creation

Generate logistics documents directly in TradeLinkOne portal. Automate document creation, routing, approvals, and data extraction to speed up processing and reduce errors. Packing lists and validated commercial invoices can also be integrated with the client's ERP.

## AI + 3-Way Validation

Leverage AI to perform 3-way matching, validating invoice content against purchase orders and packing information to minimize discrepancies and disputes. Smart alerts provide clear and real-time status updates, enhancing operational efficiency.

## Data Input by OCR

Utilize OCR to automatically read and extract information from various physical document formats, eliminating manual data entry. This reduces errors and accelerates processing.

## Centralized Document Repository

This cloud-based solution allows for centralized storage and access to all shipping documents, ensuring easy access for employees from multiple locations for real-time updates. It stores document for up to 7 years facilitates compliance policy.

## Accelerated Invoicing

Quickly issue invoices upon proof of delivery confirmation, significantly speeding up payment cycles and improving cash flow for your business.

## Enhanced Collaboration

Facilitate seamless coordination among teams and external partners, ensuring all stakeholders are aligned and informed along the logistics process. No more hard-copy approvals or physical sending by courier to minimize errors and enhance visibility.
