

PackOne

Complete Shipment Accuracy and Visibility

PackOne **automates and streamlines** your entire packing operation with a light server-client application that **eliminates errors** and **reduces manual labor**. Leveraging **RFID technology** it delivers **superior accuracy**, full item **serialization** for **complete traceability**, and the **operational efficiency** of automated bulk scanning. It ensures compliance by seamlessly generating GS1-128 labels, detailed packing lists, and ASNs. The solution incorporates **integrated scale** functionality for **capturing actual weights**, with all resulting data available for integration into your ERP system. The system is **hardware-agnostic**, integrating with your existing barcode scanners and RFID readers, and easily scales to support multiple packing stations. **Intelligent logic** and **guided workflows** optimize the process, while **multilingual support** ensures team-wide adoption. Gain **complete control** and **real-time visibility** with this **highly customizable** robust solution.

Unique Carton Serialization

PackOne assigns a unique serial number to every carton, ensuring perfect identification and complete traceability from your dock to the final destination.

Hardware Agnostic Flexibility

Our hardware-agnostic design works with your existing barcode scanners and RFID readers, eliminating costly replacements and enabling easy scalability.

RFID

RFID technology ensures every single item is automatically accounted for, creating a flawless digital chain of custody from receipt to dispatch and eliminating costly shipping errors.

Buyer-Specific Workflow Customization

PackOne customizes packing workflows, labels, and documentation to any buyer's exact requirements, ensuring compliance and preventing chargebacks.

Multi Language Support

Its intuitive, multi-language interface eliminates training barriers and ensures accurate, confident operation by any team member.
