

ShipmentOne

Drive Shipment Excellence with Precision and Traceability

TradeLinkOne's **ShipmentOne** leverages **RFID** technology to set a new standard for **serialized shipment verification** and **traceability** across the supply chain. **Item-level accuracy** empowers global brands with deeper inventory insights. **ShipmentOne** revolutionizes workflows with comprehensive **item serial tracking (EPC tracking)**, supports full serialization for compliance, dramatically improves inventory accuracy to reduce risks and costs, and provides **cloud-based** verification for seamless, **real-time** supply chain visibility.

Unparalleled Item-Level Reporting

Report at the serialized item level, enabling precise tracking and faster resolution of claims compliance issues for optimal supply chain management.

Real-time Visibility

Leverage RFID to efficiently capture all inbound and outbound warehouse shipment serial data. Share securely and seamlessly to key stakeholders in the cloud.

Reduce Inventory Shrinkage

Uncover shipment and EPC discrepancies, enabling point-to-point traceability and efficient remediation at a DC. Low inbound carton error rate enhances inventory accuracy, downstream processes and sell-through rate.

Cost & Time Saving

Conduct audits **20X faster** by targeting only potential error cartons. RFID eliminates time wasted on opening error-free cartons, cutting packing and labor costs significantly.

Serialized Workflow & Traceability

Detect serialized EPC errors for accurate receipt and critical traceability. Enables a fully serialized workflow for precise item tracking.

Protect Brand Integrity

Prevent loss, counterfeiting, and grey market threats across the supply chain with pinpoint audits, and comprehensive tracking to safeguard brand reputation.

Order Fulfilment Excellence

Improve your order fulfilment accuracy down to the individual item level, enhancing customer satisfaction and operational efficiency.
