

# mLinkOne

Packing  
made  
Effortless

Our mLinkOne Solution is your complete **cloud-based** packing solution that **automates** label printing, packing lists, and ASN generation for factories. We offer both semi and fully automated packing with **intelligent logic, guided workflows, and multilingual support** (English/Chinese/Indonesian/etc) to **optimize efficiency**. The solution incorporates **integrated scale** functionality for **capturing actual weights**, with all resulting data available for integration into your ERP system. Our system eliminates errors, **reduces manual work, and ensures compliance** - all through an intuitive, installation-free platform that gives you **complete control and packing visibility**.

## Customized Packing Workflows

Adapt packing methods, labels, and ASNs to your factory specifications. Ensure 99% packing accuracy with our independent scan verification tool that validates carton contents against the packing list.

## Seamless Integration

mLinkOne is instantly ready to use with zero setup; our cloud-based platform ensures your data is always secure and accessible from any location, eliminating traditional software delays.

## Smart Packing With AI Chatbot

The system utilizes our AI chatbot Otto to evaluate your POs to assist the user in the most efficient packing configurations and carton utilization.

## Multi Language Support

Designed for global teams with intuitive support in multiple factory local languages making it user friendly.
